U.K. CORN & SOYBEAN VARIETY YIELD RESULTS

The 2023 University of Kentucky Corn & Soybean Variety Yield results are now available online, which includes results for corn variety results at the Ohio Co. site, in cooperation with Sanderfur Farms. Booklets with results should be available in December.

Soybean: <https://varietytesting.ca.uky.edu/soybean>

The corn variety site also has corn silage yield results from three locations in Kentucky, which would be useful for livestock producers.

When evaluating variety yield results, it is good to look at the location closest to your farm but, pay particular attention to the overall summary. By selecting a variety which does well over different locations, soil types, and environment, you will have a variety which should perform well on your farm, no matter the weather conditions.
